-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 December 2002.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-9, 11-20 and 22 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 15-20 is/are allowed.
- 6) ☒ Claim(s) 1-9, 11-14 and 22 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____.
- 4) ☐ Interview Summary (PTO-413) Paper No(s). _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

Art Unit: 3712

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-9, 11-14 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Peterson in view of Shimizu, and further in view of Pearse. The claims are directed towards a method and apparatus for creating and monitoring a progress plan for a training course. Peterson discloses in column 3, line 10 to column 16, line 64 of the specification an apparatus and method of training a student comprising a computer network which creates a schedule for the user to perform the training and monitors the progress. In particular, column 12, lines 8-38 describe the use of schedule reports, which monitor the time and duration of training sessions by the user and compare the schedule with a prescribed schedule to ensure that the user is maintaining the prescribed schedule. The user is notified if he or she is not maintaining the prescribed schedule. Peterson further discloses in column 3, lines 35-36 that the computer network may comprise the Internet, and in column 15, lines 22-67 that the computer network may comprise an Intranet. Peterson fails to disclose that the method comprises defining first time units defining the time periods a trainee would like to spend on a course. Shimizu discloses in column 4, lines 2-47 of the

Art Unit: 3712

specification a method of creating a progress plan for a training program whereby the trainee can specify convenient dates and times to attend lectures, receive a list of available lectures in response, and select a preferred schedule from the list. It would have been obvious to one of ordinary skill in the relevant art to modify the method and apparatus disclosed by Peterson by providing means for defining time units representing time periods which the student would like to spend training for the purpose of allowing the student to select a preferred training schedule. Peterson and Shimzu fail to disclose the automatic creation and monitoring of a progress plan. Pearse discloses in column 3, line 5 to column 4, line 54 and in column 6, line 66 to column 7, line 45 a method of creating a progress plan for a training course whereby a progress plan is created automatically by a computer based on various external factors including time constraints. Column 3, line 51 to column 4, line 5 in particular describes the automatic scheduling process. It would have been obvious to one of ordinary skill in the relevant art to modify the method disclosed by Peterson as viewed in combination with Shimzu by providing for automatic scheduling for the purpose of making the scheduling process easier to manage, particularly for larger groups of trainees. With respect to claims 2-4 and 7, the various functions of Pearse disclosed in column 7, lines 7-40 suggest each of the various claimed features of claims 2-4 and 7. In particular, monitoring of students' progress is suggested in item (h), and sending the schedule to a user is suggested in item (I), lines 31-32. Also, Peterson discloses the monitoring of students' progress; viewed in combination with the automated system of Pearse, automated monitoring is also suggested. With respect to claims 5 and 6, Pearse discloses in various places the automatic

Art Unit: 3712

rescheduling or termination of a course, as for example in column 11, lines 20-23. In light of Pearce it would have been obvious to automatically terminate a course for any number of reasons, including a failure to complete the course, and automatic notification of such termination would be inherent in a system such as that disclosed by Pearce. With respect to claims 8, 9 and 11-13, Pearce discloses throughout the specification that the schedule is available over a network. E-mail is a well known and inherent part of a computer network. Also, while Peterson, Shimzu and Pearce fail to explicitly disclose that the program is stored on a CD or floppy disk, these are extremely well known means of storing programs and would have been obvious for the purpose of allowing the user to install the program on a computer.

Allowable Subject Matter

3. Claims 15-20 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to disclose or suggest a system having all of the limitations of claim 15, including a means for creating a progress plan for the execution of the training course dependent upon the first and second time units, and a means for monitoring the completion of the training unit as defined by applicant.

Response to Arguments

Art Unit: 3712

5. Applicant's arguments with respect to claims 1-9 and 11-14 have been considered but are moot in view of the new ground(s) of rejection. Because new grounds of rejection have been presented, this action is made non-final.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Levinson and Yokishawa disclose automatic scheduling systems.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kurt Fernstrom whose telephone number is (703) 305-0303.
